6th semester Information Technology student with a strong interest in Artificial Intelligence, software engineering, and full-stack application development. Experienced in developing AI-based and software projects using Flutter, Python, PHP, Firebase, MySQL, and Unity. Skilled in building web and mobile applications, integrating computer vision systems, and developing interactive user-focused solutions. Familiar with machine learning, object detection, database management, and modern software development workflows. Passionate about AI innovation, software development, and creating scalable technology solutions through hands-on projects and collaborative environments.

EDUCATION

President University - Cikarang, West Java **2024 - 2027 (Expected)**

Bachelor of Information Tehcnology (IT) | **GPA: 3.67/4.00**

- Concentration in Artificial Intelligence (AI).
- Relevant coursework: Data Structures & Algorithms, Database Systems, Computer Vision, Machine Learning, Web Development, Mobile Application Development, Networking, and Software Engineering.
- Strong interest in Artificial Intelligence, Deep Learning, Computer Vision, and Software Development.

ORGANIZATION EXPERIENCE

Head of Relations and Communication Division **2025 - Present**

- Supervised division members, coordinated communication strategies, and ensured all events and work plans were executed effectively and professionally.

Member of External Relations Division **2024 - 2025**

- Vice Project Manager – Informatics Connect.
 - Coordinated event operations, managed cross-divisional collaboration, and supported the successful execution of one of the major informatics events.

PROJECT

EcoScan – AI Trash Detection Mobile App **2026**

Flutter, Firebase, Python

- Developed an AI-powered trash detection mobile app using handphone camera input with real-time object detection, Firebase authentication, and detection history features.

TrainWise – AI Fitness & Nutrition Coach **2026**

Next.js, TypeScript, FastAPI, Python, Gemini API

- Developed an AI-powered fitness and nutrition web app with personalized workout plans, progress tracking, BMI/BMR/TDEE calculation, and Gemini chatbot support.

Library Management System **2025**

PHP, MySQL

- Built a full-stack library system with authentication, book management, and borrowing features.

SKILLS

- Python • JavaScript • Next.js • MySQL • AI • Computer Vision • Unity
- Flutter • React • Tailwind CSS • Firebase • ML • Object Detection • Blender

ADDITIONAL INFORMATION

- **Languages:** Indonesian, English
- **Interests:** Artificial Intelligence, Software Engineering, Computer Vision, Mobile Development.
